Oil Well Cement Testing Instruments

Cementing Mobile Laboratory

In order to adapt to domestic and foreign needs for field oil-well cement testing, we bring out mobile laboratory for field cementing to global users.

HTD32051 mobile laboratory for field cementing can carry all the instruments needed for testing oil-well cement to the drilling field. The laboratory is designed available for oil field environment and can be transferred to any oil field or offshore platform. The construction of the laboratory can resist particularly harsh environment and climate and it can work well no matter in broiling desert or freezing cementing field.

Cementing Mobile Laboratory
HTD32051

Characteristics

- It can be equipped with any necessary instrument and equipment for oil-well cement;
- It can be transferred to any oil-well field or offshore platform;
- There is no need for re-construction and no waste to clean during the transfer.
- It is for field mobile use either on drilling platform, land or trailer/guide plate;
- It is easy to move and place;
- It optimizes the design of oil-well cement tests.
- Experimental apparatus and equipment can be replaced to ensure that operators are familiar with them;
- Easy to maintain and revamp (e.g. floor finish, public utilities, instruments);
- Rest quarter for optional use and it can be operated for 24 hours.

The design, construction, connecting, public utility hardware and apparatus all passed security certificate and accorded with security specifications.

Parameters

- All cables and conduits
- One 240V/110V multiple-contact transformer
- A 4-way current circuit breaker for electric equipment
- Four 4-foot double-end fluorescent lamps
- Six 220V/15A dual power outlets
- One RGS 6 paired-cable junction box
- Two 2KW heaters
- All instruments needed by the experiments

HAITONGDA

Drilling Fluid Analytical Instruments/Oil Well Cement Testing Instruments

Warranty and Service

We guarantee our products against any defects in workmanship or material for one year. Each quotation or order confirmation states terms of trade, trade agreement and warranty.

We specialize in research and manufacturing of drilling fluid, completion fluid and oil well cement testing instruments. As a company with over 40 years of history, we have years of manufacturing experience and a complete after-sales service system. We are willing to provide a complete set of laboratory equipment solutions for you.

Product Catalog of Haitongda

Drilling Fluid Analytical Instruments

- Density testing instruments
- Rheometers
- API filter press
- High temperature and high-pressure filter press
- Mixer
- Solid content testing instruments
- High temperature aging test instruments
- Frictional coefficient testing instruments
- Lubricity analytical instruments
- Shale testing instruments
- Plugging performance evaluation instruments
- Electrochemical analytical instruments
- Overall drilling fluid laboratory solution

Oil Well Cement Testing Instruments

- Atmospheric consistometer
- High temperature and high pressure consistometer
- Atmospheric curing chamber
- High temperature and high-pressure curing kit
- Ultrasonic cement analyzer
- Constant speed mixer
- Rotational viscometer
- Pressurized densitometer
- Data collection and control system
- Overall oil well cement laboratory solution
